For institutions and correctional facilities

Vandal resistant drinking water system

Dispense boiling and chilled water instantly, safely and securely

# Secure and safe drinking water systems from Zip Water

With unrivalled expertise in instant filtered boiling, chilled and sparkling water systems, Zip Water is known globally for being the creators of the world's most innovative and advanced drinking water systems, manufacturing Australian designed and made water systems since 1947.

Zip Water is proud to provide institutions and industries across Australia with the HydroTap Industrial Models, offering customised water management systems that are efficient and safe.

## **Zip HydroTap Industrial**

- High strength vandal resistant tapered base
- Anti-twist clamp block under bench installation
- Installed over sink or on an optional font (sold separately)
- IP68 push buttons to extend longevity
- Connectivity solutions available

# Zip HydroTap Industrial Models

Vandal resistant drinking water system with a robust design for institutions and industry, dispensing boiling and chilled filtered water instantly.

Zip Water has been trusted in many custodial projects in Australia to deliver customised drinking water management systems in an efficient and safe environment for inmates, staff and service contractors.

Zip HydroTap Industrial model has been developed to ensure the highest safety features, suitable for institution and industrial use.

The Industrial Side Touch (ISS) has an integrated tap design, with a high strength vandal resistant tapered base that is fastened to an under bench anti-twist clamp block via a high strength steel spine, reinforcing the whole length of the tap shank.

The industrial tap design also incorporates IP68 push buttons to extend longevity of the tap.

Zip HydroTap Industrial models provide pure-tasting water in an instant. The command centre allows the flexibility of adjusting the boiling water temperature from 100°C to 68°C.

Most institutions safely lock the command centre in a secure cupboard to ensure the settings are not easily accessible. The Industrial Side Touch tap incorporates a smart two button operation for boiling water.

## Connectivity solutions for Zip HydroTap

Zip HydroTap Industrial models have the option to customise connectivity solutions to suit your needs with hard wired or wi-fi internet options available.

### Ethernet

Hard wired connection enabling integration into existing BMS systems for clients who have increased security requirements.

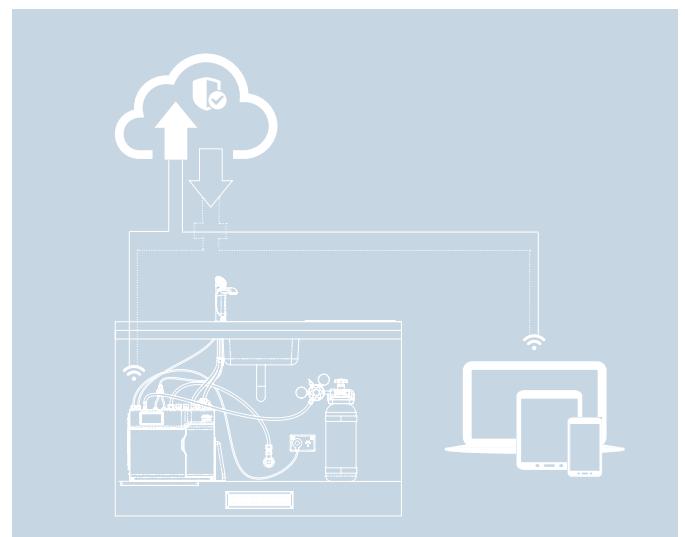

### Wi-Fi with Zip Assist

Zip Assist delivers a smart, connected solution to help businesses reduce costs and improve efficiencies with their Zip HydroTap, by managing one or multiple Zip HydroTap systems installed across many locations, buildings and sites, from any device across Australia.

Connecting a HydroTap to Zip Assist allows owners and facility managers to:

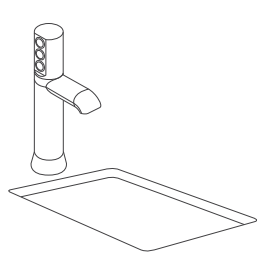

- easily and securely monitor the health and performance of their HydroTap systems
- make changes to the functional settings on their Zip HydroTap systems

Note: Zip Assist is compatible with Zip HydroTap G4 models and can be retro-fitted to products in existing installations.

# Technical details

## Product details

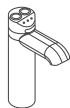

Available finish

**Bright Chrome**

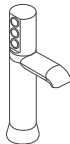

Industrial Side Touch can be installed over a sink or on a specially designed font. Requires an optional font kit to be purchased separately.

## Accessories

Tapered base and font kit for the Industrial Side Touch Tap (ISS)

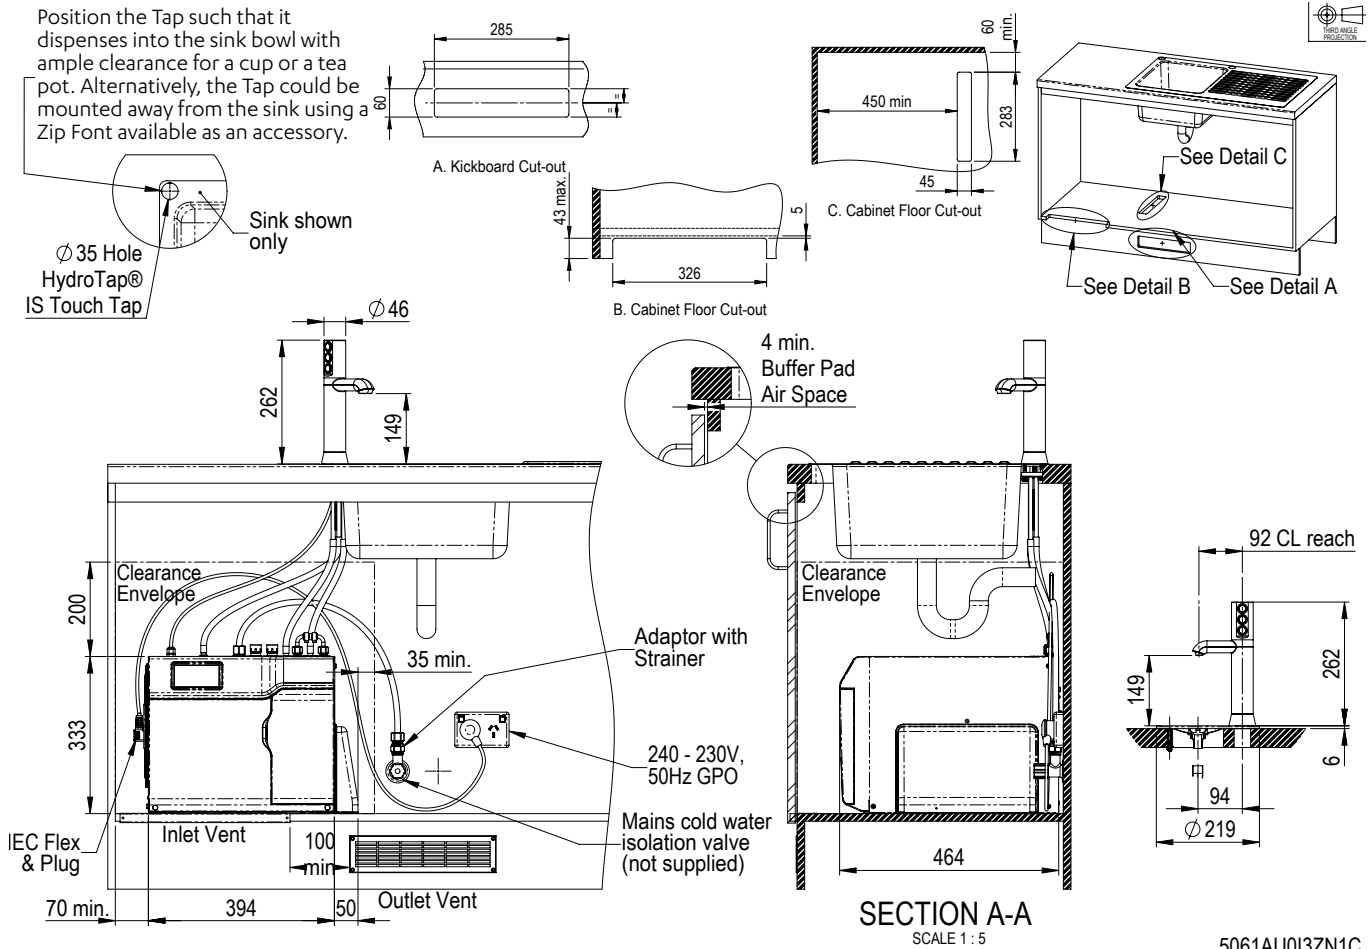

**90982** - Tapered Base Kit - for ISS Tap Only for Industrial Side Touch

**90869** - Font Kit- ISS Touch Tap - use with tapered base only Industrial

## Kitchen layout drawing

Position the Tap such that it dispenses into the sink bowl with ample clearance for a cup or a tea pot. Alternatively, the Tap could be mounted away from the sink using a Zip Font available as an accessory.

Contact your Zip team for alternative ventilation options.
